

# EUDR Workshop tailored to your needs

## Get prepared for compliance and beyond

The EU Deforestation Regulation (EUDR) will enter into force on 30 December 2025 for large operators and traders and on 30 June 2026 for micro and small businesses. It is set to transform global supply chains, pushing companies to ensure their products are deforestation-free. To comply, you will need to collect geolocation data from the origins, ensure traceability, conduct risk assessments, and prepare due diligence statements. Solid preparation and collaboration across your entire supply chain are essential.

## Why choose our workshop?

We believe in empowering businesses to tackle the EUDR with confidence. Instead of committing to complex, long-term solutions right away, the session will provide you with the perfect first step: practical, independent guidance.

This approach has proven to be highly effective for companies in various industries. Designed to involve key representatives from your organisation, the workshop empowers you to define next steps and make informed decisions about internal and external needs.

## About Seedtrace

With a traceability tool and EUDR compliance guide Seedtrace supports companies in establishing and maintaining deforestation-free supply chains. As a technology provider, we offer a comprehensive solution for geodata collection, deforestation risk analysis, and an end-to-end due diligence process, to meet the requirements of EUDR.

## Typically included deliverables of the EUDR workshop (choose your scope)

- ✓ An overview of relevant compliance requirements, tailored to your industry.
- ✓ A concise current-state assessment of your company's EUDR readiness, identifying gaps and key risks.
- ✓ Actionable recommendations, with prioritised steps for improvement.
- ✓ A high-level implementation roadmap to guide your compliance efforts.

## Tailored modules designed for your success

- **EUDR requirements overview:** Get up-to-date, industry-specific insights into what the regulation requires.
- **EUDR affectedness analysis:** Understand how the regulation impacts your company specifically and identify potential exposure.
- **Clarification of key questions and legal provisions:** Dive deep into the central aspects of the regulation, identifying which products and processes will need your attention.
- **Implementation Roadmap and Prioritisation:** Develop actionable next steps to ensure smooth and timely compliance.

The workshop, with a customisable length of 0.5 to 3 days, is facilitated by one or two experts from the Seedtrace team and will be thoroughly documented. Costs are incurred as a one-time fee with no further obligations.

## Get in touch

Reach out to discuss your individual needs and setup and receive a personalised workshop offer. Together, we can make sure to future-proof your business.
